I am a second-year M.Sc. student in the PALM Lab (led by Prof. Xin Geng) @ Southeast University (SEU) supervised by Prof. Hongsong Wang, currently exploring new frontiers as a Research Intern at Tencent's YouTu Lab. Prior to that, I was a remote visiting student at LV LAB @ Singapore Management University (SMU), advised by Prof. Pan Zhou.

My academic journey began at Shenzhen University (SZU), where I built a strong interdisciplinary foundation by earning a dual bachelor's degree. I graduated with a B.E. from the College of Computer Science and Software Engineering (CSSE) and a B.Sc. from the School of Mathematical Sciences (MS). It was there, under the mentorship of Prof. Can Gao, that I first delved into academic research.

My research interests mainly revolve around RLHF, RLVR, AIGC, and 3D Human Modeling. I am actively seeking (1) `research internships` at top-tier companies available after Mar. 2026, (2) `Ph.D. positions` for Fall 2027 (preferably in America, Singapore, or Hong Kong SAR), and (3) other `research collaborations`. Feel free to reach out via 📧 Email: `xiaofengtan@seu.edu.cn` or 💬 WeChat: `txf_06_20`. I'd be happy to connect 😊 . And if you'd like to talk about *Doraemon* 😺 , that works too.
